

# ReCree8® PCR LDPE Clear Bags

Australia's first - Clear bags made with 100% ReCree8® resin

## WHAT IT IS

These Clear Bags are made with **100% ReCree8® resin, a GECA verified resin made from 100% post-consumer soft plastic waste** – this resin is produced from soft plastic waste that has been collected, cleaned, and reprocessed into high-performance flexible packaging. This is verified, auditable recycled content. Not a blend. Not a claim.

## WHY NOW?

Virgin LDPE resin costs are elevated. ReCree8® PCR LDPE delivers comparable performance at a competitive price point – without the virgin resin exposure.

## PERFORMANCE & APPLICATION

- **Heavier-gauge LDPE** – greater thickness and tear resistance than standard liners
- **High clarity** – superior transparency for content identification and sorting
- **Excellent stretchability** – conforms under load without splitting
- **Leak-proof construction** – engineered for liquid and heavy waste streams
- **Consistent gauge** – vertically integrated manufacturing, quality controlled
