

ReCree8[®] Xtreme[™]

Heavy Duty PCR Hospitality Liner — Built for Tough Waste Streams

WHAT IT IS

The ReCree8[®] Xtreme[™] is made with 100% ReCree8[®] resin — a GECA verified resin produced from post-consumer soft plastic waste.

Built specifically for the demands of hospitality waste — bottles, food waste, liquid, and sharp debris— where bag failure is not an option.

WHY NOW?

Hospitality operators face increasing scrutiny on sustainability claims from corporate parents, venue operators, and cleaning contractor tenders.

Generic recycled content bags lack the certification trail to satisfy procurement audits or ESG reporting.

The ReCree8[®] Xtreme[™] is the first heavy duty hospitality liner in Australia with independently verified PCR content — giving operators a credible, auditable answer to that scrutiny.

PERFORMANCE & APPLICATION

- **40µm heavy duty gauge** — engineered for sharp debris, bottles, and wet waste without splitting
- **High puncture resistance**— handles mixed hospitality waste including glass and food waste
- **Leak-proof construction** — sealed for liquid-heavy waste streams
- **On-roll format** — 100 bags per roll, easy sequential dispensing
- **Carton dispense perforation** — built-in front dispense opening, no separate dispenser required
- **Printed credential messaging** — ReCree8[®] PCR branding visible on every bag, supporting venue sustainability communications

ESG REPORTING — VERIFIED IMPACT

Per 1,000 kg of ReCree8[®] material:

- **2,370 kg CO₂ avoided**
- **143,000 L water saved**
- **7,500 kWh energy saved**
- **1,000 kg virgin plastic displaced.**

HOW IT COMPARES — CHOOSING THE RIGHT BAG

	Generic Recycled Content Bags	ReCree8 [®] Xtreme [™]
Material origin	Partial blend — unspecified	100% PCR-verified
Third-party verification	None	GECA authenticated
Supply chain traceability	Not Available	GRS & RecyClass certified
ESG reporting data	Not Available	ISO-backed data available
Tender-ready	No	Yes
Printed PCR credential on bag	No	Yes
Circular economy	No	Closed-loop supply chain
